## Objective

---

Aspiring Java Full-Stack Developer with solid experience in C, C++, Java, and Oracle, seeking an opportunity to contribute to innovative projects by leveraging my skills in both front-end and back-end development. Eager to grow in a collaborative environment and deliver efficient, scalable software solutions.

## Education

---

- RTMNU  
Btech  
6.02 3rd

## Skills

---

- Technical Skills Programming Languages: C, C++, Java Database Technologies: Oracle (SQL, PL/SQL) Object-Oriented Programming (OOP)

## Projects

---

- Chatbot-Intelligent virtual assistant**

Project: Chatbot – Intelligent Virtual Assistant

Role: Java Full-Stack Developer

Technologies: Java, Spring Boot, NLP (Dialogflow / Rasa), HTML, CSS, JavaScript, MySQL

Description:

Designed and developed a chatbot capable of handling user queries and providing instant, context-aware responses. Integrated Natural Language Processing (NLP) for understanding user intents and delivering accurate replies. Implemented both frontend and backend components to ensure seamless user experience and real-time interaction.

Key Features:

NLP integration for understanding and processing user input

RESTful APIs for backend communication

Database management for storing user interactions

Responsive UI for web-based interaction
